*Excerpts from
Synchronicity*

"...we need to be open to fundamental shifts of mind. We have very deep mental models about how the world works, deeper than we can know. To think that the world can ever change without changes in our mental models is folly."

"Operating in this different state of mind and being, we come to a very different sense of what it means to be committed."

"When this new type of commitment starts to operate, there is a flow around us."

Despite endless talk, the being of leadership is still one of the most rare and needed qualities in our businesses, communities and personal lives.

SYNCHRONICITY: THE INNER PATH OF LEADERSHIP
